CIEE102, Spring 2021

Lab 10

1. Write a C program that reads in two integers and uses a defined macro to determine the larger integer.
2. Write a program that produces the following output:

   The sum of x and y is 13

   The program should define macro SUM with two arguments, x and y, and use SUM to produce the output.
3. Write a C program to print the values of the predefine symbolic constants _LINE_, _FILE_, _DATE_, _TIME_.
4. Write a program that defines and uses macro PRINT to print a string value.
